## EDITORIAL

## Genes & Diseases: Moving molecular and translational medicine forward

Welcome to the inaugural issue of *Genes & Diseases*, a peer-reviewed international journal that aims to facilitate a rapid dissemination and exchange of scientific advances about human diseases between basic science investigators and physicians worldwide.

*Genes & Diseases* focuses on publishing investigations on the molecular bases and experimental therapeutics of human diseases. Human medicine is undoubtedly a rapidly evolving field. The journal's emphasis is placed on hypothesis-driven, mechanistic studies relevant to the pathogenesis and/or experimental therapeutics of human diseases. Thus, *Genes & Diseases* has a broad scope in basic and translational biomedical research related to molecular biology, molecular genetics, cell biology, and experimental medicine. The current publication formats include full length research article, review article, short communication, correspondence, perspectives, commentary, views on news, and research watch.

As *Genes & Diseases* is devoted to publishing articles pertaining in the broad context to human diseases, our goal is to make the journal into one of the preeminent repositories of knowledge and platforms for basic and translational research in medicine. The peer review process will match knowledgeable reviewers with submitted manuscripts to produce high quality articles of interest and scientific merit. We are guided by the conviction that the ultimate goal of biomedical research is to prevent and treat human diseases. Thus, the highest priority will be given to publishing studies that may significantly advance human health.

We are experiencing an era of rapid change and transformation in human medicine, driven mostly by new technological advances. Since the completion of the human genome sequencing project in the early 2000's, next-generation sequencing technologies and the big data era have emerged, and have had a major impact on understanding the pathogenesis and developing innovative therapeutics for

human diseases. Next-generation sequencing-based analyses not only offer unprecedented opportunities to unravel the molecular bases of human diseases, but also to move personalized medicine closer to reality than ever before. The recent development of induced pluripotent stem (iPS) cell technology should further enable us to generate individual derived iPS cells to model disease development, to study organ genesis, to develop new therapeutic strategies, and to repair damaged tissues or organs through regenerative medicine.

It is exciting to behold the medical field entering a golden age of applications of bench findings to create dramatic clinical improvements in the diagnosis, prognosis, and treatment of human diseases. *Genes & Diseases* will leverage findings from basic and translational research, as well as innovative methods and technologies in biomedical sciences, which should ultimately lead to the development of novel diagnostics and therapeutics, as well as effective preventive measures, for human diseases. Our hope is that *Genes & Diseases* will provide high quality and stimulating papers with cutting-edge information for both physicians and basic science investigators.

We are proud to present our distinguished Editorial Board consisting of experts from the basic and medical research communities worldwide (see below). We wish to extend our gratitude to both the members of the Editorial Board and the Editorial Office staff, as they are the backbone of this scientific endeavor and have graciously given their time and effort to ensure the successful launch of *Genes & Diseases*. We couldn't envision starting this journal without the support and professionalism of these established investigators interested in this fascinating field of biomedical research and wishing to make our journal a success. We also want to thank our contributors for sharing their research, as well as knowledge and expertise, to generate this inaugural issue of *Genes & Diseases*.

Please enjoy this inaugural issue. We hope you will consider *Genes & Diseases* when deciding where to submit your next paper. We are confident that with your support

Peer review under responsibility of Chongqing Medical University.

and participation, *Genes & Diseases* will become an outstanding forum for the presentation of molecular and translational medical research.

## Genes & Diseases

**An international journal for molecular and translational medicine**

### Editorial Board

#### Editor-in-Chief

T.-C. He, MD, PhD, The University of Chicago Medical Center, Chicago, IL, USA

#### Deputy Editor-in-Chief

Ailong Huang, Professor and Vice President, Chongqing Medical University, Chongqing, China

#### Senior Advisory Board

##### Chair

Han Lei, MD, Professor and President, Chongqing Medical University, Chongqing, China

##### Members

Xuetao Cao, MD, PhD, Professor and Academician of CAS, Chinese Academy of Medical Sciences, Beijing, China

Jing Cheng, PhD, Professor and Academician of CAE, Tsinghua University, Beijing, China

Daiming Fan, MD, PhD Professor and Academician of NAS and CAE, Beijing, China

Lanjuan Li, MD. Professor and Academician of CAE, Zhejiang University, Hangzhou, China

Zhengguo Wang, MD, Professor and Academician of CAE, Third Military Medical University, Chongqing, China

Huanming Yang, PhD, Professor and Academician of NAS and CAS, Beijing Institute of Genomics, Beijing, China

Shusen Zheng, MD, Professor and Academician of CAE, Zhejiang University, Hangzhou, China

Nanshan Zhong, MD, Professor and Academician of CAE, Guangzhou Institute of Respiratory Diseases, Guangzhou, China

Honghao Zhou, MD, Professor and Academician of CAE, Central South University & Chongqing Medical University, Changsha, China

#### Executive Associate Editors

Nickolai Dulin, PhD, The University of Chicago Medical Center, Chicago, IL, USA

Fei Li, MD, PhD, University of Illinois at Chicago, Chicago, IL, USA

Wei Zhou, PhD, Emory University Winship Cancer Center, Atlanta, GA, USA

#### Managing Editor

Sherry Luo, MD, Chongqing Medical University, Chongqing, China

### Assistant Editors

Kevin Liu, MD, Chongqing Medical University, Chongqing, China

Daisy Tang, MSc, Chongqing Medical University, Chongqing, China

### Associate Editors

Andreas Bikfalvi, MD, PhD, INSERM U 1029, Talence, France

Gerald W Dorn II, MD, Washington University School of Medicine, St. Louis, MO, USA

Hicham M. Drissi, PhD, University of Connecticut Health Center, Farmington, CT, USA

Yang-Xin Fu, MD, PhD, The University of Chicago Medical Center, Chicago, IL, USA

Jim Hu, PhD, University of Toronto and Hospital for Sick Children, Toronto, ON, Canada

Irena Levitan, PhD, University of Illinois at Chicago, Chicago, IL, USA

Xiongzong Ruan, MD, PhD, University College London, London, UK

Ronald JA Wanders, PhD, University of Amsterdam, Amsterdam, The Netherlands

Da-Zhi Wang, PhD, Harvard Medical School, Boston, MA, USA

Andre van Wijnen, PhD, Mayo Clinic School of Medicine, Rochester, MN, USA

Keping Xie, MD, PhD, University of Texas M D Anderson Cancer Center, Houston, TX, USA

Rosie R. Xing, PhD, Chongqing Medical University, Chongqing, China

Qingbo Xu, MD, PhD, Kings College London, London, UK

Lin Zhang, PhD, University of Pittsburgh Cancer Center, Pittsburgh, PA, USA

### Statistics Editors

Dezheng Hou, MD, PhD, The University of Chicago Medical Center, Chicago, IL, USA

Xiaoyan Iris Leng, MD, PhD, Wake Forest University Health Systems, Winston-Salem, NC, USA

### Editorial Board Members

Giuseppe Altavilla, MD, DSc, University of Messina, Messina, Italy

Sergey Anisimov, MD, DSc, VA Almazov Medical Research Center, St. Petersburg, Russia

Jesus Avila, PhD, Universidad Autónoma de Madrid, Madrid, Spain

Marcelo Bonini, PhD, University of Illinois at Chicago, Chicago, IL, USA

Timothy A. Chan, MD, PhD, Memorial Sloan-Kettering Cancer Center, New York, NY, USA

Jianjun Chen, PhD, The University of Chicago Medical Center, Chicago, IL, USA

Hueng-Sik Choi, PhD, Chonnam National University, Gwangju, Korea

Aiko P.J. De Vries, MD, Leiden University Medical Center, Netherlands, Leiden, The Netherlands  
Mingqing Du, PhD, University of Cambridge, Cambridge, UK  
Matthias Eckhardt, PhD, University of Bonn, Bonn, Germany  
Y. Murat ELÇİN, PhD, Chair and Deputy Director, Ankara University Stem Cell Institute, Ankara, Turkey  
Jiliang Gao, PhD, National Institutes of Allergy and Infectious Diseases, Bethesda, MD, USA  
Chunhai Charlie Hao, MD, PhD, McGill University, Montreal, QC, Canada  
Vasif Hasirci, PhD, Middle East Technical University, Ankara, Turkey  
Leonard Girnita, MD, PhD, Karolinska Institute, Stockholm, Sweden  
Vsevolod V Gurevich, PhD, Vanderbilt University, Nashville, TN, USA  
George Huang, DDS, DSc, University of Tennessee Health Sciences Center, Memphis, TN, USA  
Yuri Kotelevtsev, PhD, University of Edinburgh, Edinburgh, Midlothian, UK  
Jie Liang, PhD, University of Illinois at Chicago, Chicago, IL, USA  
Pentao Liu, PhD, Wellcome Trust Sanger Institute, Cambridge, UK  
Jun Lu, PhD, Yale University, New Haven, CT, USA  
Avudai Maran, PhD, Mayo Clinic College of Medicine, Rochester, MN, USA  
Adam Marcus, PhD, Emory University School of Medicine, Atlanta, GA, USA  
Eiji Miyoshi, MD, PhD, Osaka University, Osaka, Japan  
John F. Moorhead, MD, University College London, London, UK  
Dietbert Neumann, PhD, Maastricht University, Maastricht, The Netherlands  
Heyu Ni, MD, PhD, University of Toronto, Toronto, ON, Canada  
Sergey Orlov, MD, PhD, Russian Academy of Medical Sciences, Moscow, Russia  
Ming Pei, MD, PhD, West Virginia University Medical Center, Morgantown, WV, USA  
Boris Popov, MD, PhD, Russian Academy of Sciences, St. Petersburg, Russia  
Ling Qin, PhD, University of Pennsylvania, Philadelphia, PA, USA

Nader Rahimi, PhD, Boston University Medical Center, Boston, MA, USA  
Roger Schreiner, PhD, University of Fribourg, Fribourg, Switzerland  
Hiroshi Shibuya, PhD, Tokyo Medical and Dental University, Tokyo, Japan  
Massimo Stefani, PhD, University of Florence, Florence, Italy
